july	august	september
Q4 Intermediate 01,02 Expert 02: Alternators Expert 03: 6000 Series Control Systems	Advanced Accreditation Authorised Instructor Intermediate 01,	Intermediate 01,02
october	november	december

Russian ATC's Appointed

At FG Wilson we place great emphasis on the provision of high quality training to the global Dealer network. For continued success, we believe that Dealerships around the globe should avail of opportunities to gain expert generating set knowledge.

We would like to congratulate Russian Dealers, President Neva and Madek, who were recently awarded Authorised Training Centre (ATC) status. In addition, Madek intend to revamp their current training centre, a sneak preview of which will be available in the next edition of "talk".

A new training initiative to elevate Dealerships to Authorised Training Centre's (ATC), enables Dealers to train staff and customers in their own territory. Achieving ATC status permits a trained member ('Train the Trainer' certified) of staff to conduct FG Wilson foundation and

intermediate training. ATC's therefore increase the accessibility of high quality training whilst minimising the geographical and language constraints for trainees.

To obtain ATC status Dealers must meet the minimum facility standards and employ a trainer who has obtained 'Train the Trainer' certification.

For more information on ATC's please contact:
producttraining@fgwilson.com
